Artist's Name: \_\_\_\_\_ Ext: \_\_\_\_\_ Rep: \_\_\_\_\_ Ext: \_\_\_\_\_

**NOTE:** Art can be designed for dual-purpose heights. If only 1 height pole is used, lower half becomes hidden in the retractor.

Background of image should fill entire grid to the crop marks.

 If using at just full height, then avoid putting critical art elements in the two dark gray areas, or they could be hidden from view or trimmed off.

 If also using at 1 pole height, then you must also avoid putting critical art elements in the light gray area as well. Art elements that you want hidden when partially retracted, must be below the 5 inch area. Art elements that you want to show when retracted, must be above the 5 inch area.

We require these 5 inch buffer areas to ensure that what you want to show, will show and what you want hidden, will be hidden.

ONE POLE HEIGHT
